

REGULAR MEETING OF THE BOARD OF DIRECTORS LA PUENTE VALLEY COUNTY WATER DISTRICT 112 N. FIRST STREET, LA PUENTE, CALIFORNIA MONDAY, JULY 14, 2025, AT 4:30 PM

1. CALL TO ORDER

2. PLEDGE OF ALLEGIANCE

3. ROLL CALL OF BOARD OF DIRECTORS

President Escalera Vice President Barajas Director Argudo

Director Hernandez____ Director Rojas____

4. PUBLIC COMMENT

Anyone wishing to discuss items on the agenda or pertaining to the District may do so now. The Board may allow additional input during the meeting. A five-minute limit on remarks is requested.

5. ADOPTION OF AGENDA

Each item on the Agenda shall be deemed to include an appropriate motion, resolution or ordinance to take action on any item. Materials related to an item on this agenda submitted after distribution of the agenda packet are available for public review at the District office, located at the address listed above.

6. APPROVAL OF CONSENT CALENDAR

There will be no separate discussion of Consent Calendar items as they are considered to be routine by the Board of Directors and will be adopted by one motion. If a member of the Board, staff, or public requests discussion on a particular item, that item will be removed from the Consent Calendar and considered separately.

- A. Approval of Minutes of the Regular Meeting of the Board of Directors held on June 23, 2025.
- B. Approval of District's Expenses for the Month of June 2025.
- C. Approval of City of Industry Waterworks System Expenses for the Month of June 2025.
- D. Receive and File the District's Water Sales for June 2025.

Page 1 of 2

lapuentewater.com

| Date: | July 14, 2025 |
|-----------------|--|
| То: | July 14, 2025 Honorable Board of Directors |
| Subject: | Consideration of Proposal from Civiltec Engineering Inc. to provide a UVAOP Replacement Feasibility Study |
| Purpose: | To secure professional consulting services to conduct a feasibility study for the replacement of the District's existing ultraviolet/advanced oxidation process (UVAOP) water treatment system at the Baldwin Park Operable Unit ("BPOU"). |
| Recommendation: | Authorize the District's General Manager to proceed with the work as proposed by Civiltec Engineering Inc. as provided in their proposal dated June 5, 2025, resulting in a capital expense to the BPOU Treatment Facility of \$98,255. |
| Fiscal Impact: | The 2025 BPOU Treatment Plant Budget does not appropriate capital expenses. Under the 2017 BPOU Agreement, capital costs are handled on a case-by-case basis. Staff contacted the CR's and received written approval to proceed with the proposed work from Civiltec. The cost for the feasibility study is a BPOU expense and shall be 100% reimbursed by the |

BACKGROUND

The existing UVAOP system at the District's groundwater treatment facility is nearing the end of its useful life. The system manufacturer has indicated that it will soon discontinue support and service, prompting the need to assess replacement options to ensure continued reliable treatment performance.

This project will consist of performing a feasibility study for the new UV water treatment system to evaluate options and document the findings. The study will evaluate spatial, electrical, hydraulic, construction costs, and construction phasing requirements to confirm the feasibility of the UV system replacement without significant disruptions to the plant operations.

SUMMARY

Civiltec Engineering, Inc. submitted a proposal dated June 5, 2025, outlining the scope, schedule, and cost to complete the feasibility study. The study includes:

- Project management and coordination
- Site investigations and basemap development

Cooperating Respondents.

- Coordination with UV equipment vendors
- Development of design criteria

(626) 330-2126 lapuentewater.com

- Hydraulic analysis of existing pumping systems
- Conceptual layouts and site configurations
- Construction cost estimates for two siting options
- Permitting requirements review
- Preparation of a draft and final feasibility study

The total cost for the study is \$98,255, with an anticipated completion date of September 2, 2025.

FISCAL IMPACT

The 2025 BPOU Treatment Plant Budget does not appropriate capital expenses. Under the 2017 BPOU Agreement, capital costs are handled on a case-by-case basis. Staff contacted the CR's and received written approval to proceed with the proposed work from Civiltec. The cost for the feasibility study is a BPOU expense and shall be 100% reimbursed by the Cooperating Respondents.

RECOMMENDATION

Authorize the District's General Manager to proceed with the work as proposed by Civiltec Engineering Inc. as provided in their proposal dated June 5, 2025, resulting in a capital expense to the BPOU Treatment Facility of \$98,255.

Respectfully Submitted,

Roy Frausto General Manager

ENCLOSURES

- Civiltec Proposal

California • Arizona

June 5, 2025

La Puente Valley County Water District 112 N 1st Street La Puente, CA 91744 Sent Via Email: rfrausto@lapuentewater.com

ATTN: Roy Frausto | General Manager

RE: Proposal for UVAOP Replacement Feasibility Study La Puente, CA 91744 | *Civiltec* Proposal No. PM25033

Dear Roy,

Civiltec engineering, inc. (Civiltec) appreciates the opportunity to provide professional engineering services to La Puente Valley County Water District (LPVCWD) for the above referenced project. We understand this project is for the replacement of the existing ultraviolet (UV) water treatment system at LPVCWD's groundwater treatment facility located on Puente Ave in Baldwin Park, California.

Because the facility's existing UV treatment system is reaching the end of its remaining useful life and the vendor for the system has notified LPVCWD that they will be ending service support for the system within the next few years, LPVCWD is undertaking this feasibility study for a new UV treatment system.

This project will consist of performing a feasibility study for the new UV water treatment system to evaluate options and document the findings. The study will evaluate spatial, electrical, hydraulic, construction costs, and construction phasing requirements to confirm the feasibility of the UV system replacement without significant disruptions to the plant operations.

We anticipate an evaluation of utilizing the existing treatment building vs providing a new treatment building for the new UV equipment will be required to fully consider the benefits and constraints of each option.

Civiltec will develop conceptual layouts of the new equipment, identify locations of potential connections to existing systems for integration, and system upgrades necessary to provide power and hydraulic capacity.

AUTHORIZED RESPONSIBLE ENGINEERS

Civiltec proposes to assign C. Shem Hawes, PE, as company representative. He is a Principal in the firm and the Fullerton Branch Manager. He will be responsible for the firm's timely response and quality completion. He has complete authority to handle all contractual matters, commit *Civiltec's* resources and take all action necessary to meet your requests. Shem will be assisted by Steven Walker, PE, as the senior process project engineer and Heber Torres, PE, as the principal electrical engineer. *Civiltec* will manage this project directly from our Fullerton office.

Roy Frausto | La Puente Valley County Water District UVAOP Replacement Feasibility Study June 5, 2025 Page 2

SCOPE OF SERVICES

Based on our project understanding and professional experience, we have identified the following scope of services.

Phase 1 – Project Management, Meetings, and Site Visits

Task 1. Project Management

Civiltec will provide project management to track project progress, document key design decisions, and ensure the project is delivered in a timely manner.

Task 2. Progress Meetings

Civiltec will hold monthly progress video teleconference meetings to review the current state of the of work, discuss issues or constraints, and updated project team members.

Task 3. Workshop Review of Draft Feasibility Study

Civiltec will hold a teleconference workshop to review of the draft Feasibility Study with LPVCWD to present the evaluations performed, costs and non-costs considerations, and recommendations.

Comments from this workshop will be addressed/incorporated into the draft Feasibility Study submittal for review by LPVCWD and project stakeholders. Review comments on the draft Feasibility Study will addressed/incorporated into the final document.

Phase 1 Deliverables:

- Meeting summaries
- Workshop summary

Phase 2 – Existing Conditions Research and Basemap Development

Task 1. Existing Conditions Research

Civiltec will perform a complete utility and data research of the site. Our objective is to obtain all record information available for the site including record drawings of the site improvements, boundary information, aerial photographs, vertical and horizontal control, title records, geologic data, etc.

This will supplement the record utility documentation that currently resides on *Civiltec's* servers. Having original AutoCAD files of the existing utility conditions on-site will enable us to quickly move into formalizing the design elements of the project.

Task 2. Compile Data and Develop Existing Conditions Basemap

Civiltec will prepare a base drawing of the existing site and treatment building based on field investigations and record information. No survey or subsurface utility location field work is proposed.

Civiltec will compile the data into new AutoCAD electronic files for use in this feasibility study and a future project to develop detailed design plans of the UV treatment system replacement.

Phase 2 Deliverables:

- Electronic AutoCAD Basemap

Phase 3 – Coordination with Equipment Vendor

Task 1. UV Equipment Spatial, Power, and Process Requirements

Civiltec will conduct meetings and correspondence with the UV equipment vendor to obtain data on the spatial layout of the new UV equipment, determine the required piping configurations to provide laminar flow and pressure constraints, quantify process consumables such as hydrogen peroxide or pH adjustment chemicals, and power requirements. The equipment vendor's system configuration will be based on the facility's water quality data record information and treatment goals.

This information will be used to evaluate the existing facility's ability to accommodate the equipment into the site constraints, utilize new hydrogen peroxide storage/metering pumping, and power requirements.

Data from the UV vendor will be compiled into an appendix to the Feasibility Study for reference.

Phase 4 – Design Criteria Technical Memorandum

Task 1. Design Criteria Technical Memorandum

Civiltec will develop a technical memorandum to establish the project design criteria. This data will include items such as process treatment effluent goals, flow capacity, number of UV treatment trains, redundant equipment, and materials of construction.

The technical memorandum will be submitted in draft form for review by the LPVCWD and project stakeholders. The finalized technical memorandum will be used as a roadmap for preparing the Feasibility Study and included as one of its appendices.

Phase 4 Deliverables:

- Draft and finalized technical memorandum

Phase 5 – Hydraulic Analysis

Task 1. Hydraulic Analysis of Existing Pumping Systems

The existing UV process requires a UV effluent pumping system to deliver the treated water to the offsite LPVCWD Hudson Reservoir. A hydraulic analysis will be performed to determine if the replacement UV system will have the capability to eliminate this pumping system and provide operational cost savings. The evaluation will include recommended modifications to the existing air stripper towers effluent pump system (aka the influent pump station) needed, if any, to allow the elimination of the existing UV effluent pump system.

The goal of this task is to determine the ability/requirements to remove the existing UV treatment effluent pumping system which would allow future power and maintenance cost savings.

Phase 6 – Concept Layouts

Task 1. Equipment Process/Mechanical Layouts

Civiltec will prepare mechanical layouts of the new UV equipment. The layouts will seek to utilize the northern section of the existing treatment building to the greatest extents possible. Should the existing building be determined to have insufficient space to house the equipment *Civiltec* will develop optional layouts on locating portions of the equipment into adjacent facility areas and/or new structures.

Because the study is anticipated to evaluate siting the new UV treatment system within the existing treatment building vs housing the equipment in a new treatment building, we anticipate the development of two conceptual process/mechanical layouts.

Task 2. Electrical Support System Layouts

Civiltec will develop layouts of new/modified existing electrical support systems for the new UV equipment. Should a new service transformer be required we will reach out to the power authority to confirm the feasibility, lead time on obtaining the upgraded power service, and establish a point of contact within the agency for the project.

Because the study is anticipated to evaluate siting the new UV treatment system within the existing treatment building vs housing the equipment in a new treatment building, we anticipate the development of two conceptual electrical support system layouts.

Task 3. Site Yard Piping Layouts

Civiltec will develop site yard layouts illustrating new piping alignments, points of connection to existing piping systems, and temporary piping configurations to be used in the interim DDW testing period.

Because the study is anticipated to evaluate siting the new UV treatment system within the existing treatment building vs housing the equipment in a new treatment building, we anticipate the development of two conceptual site yard piping system layouts.

Phase 6 Deliverables

- 6 Concept layouts

Phase 7 – Construction Cost Estimates of UV Equipment Siting Options

Task 1. Cost Estimate – Utilizing UV Equipment in Existing Treatment Building

Civiltec will develop a construction cost estimate to the utilizing spare space in the existing treatment building for the new UV treatment system. Building modifications are anticipated and may require specialized alterations such as concrete slab demolition for new below grade piping, temporary existing building structural demolition/restorations to allow the UV treatment equipment to be moved to the interior, and possible expansion of the building footprint or roof elevation to provide sufficient space.

Civiltec will develop the cost estimate to be included in the evaluations of siting options of the Feasibility Study and included as one its appendices.

Task 2. Cost Estimate – UV Equipment in New Treatment Building

Civiltec will develop a construction cost estimate to providing a new treatment building for the new UV treatment system. This option may require costs items such as realignment/relocation of existing utility lines, temporary construction piping, and selective positioning to ensure maintenance vehicles have access to adjacent facilities.

Civiltec will develop the cost estimate to be included in the evaluations of siting options of the Feasibility Study and included as one its appendices.

Roy Frausto | La Puente Valley County Water District UVAOP Replacement Feasibility Study June 5, 2025 Page 5

Phase 7 Deliverables

- Cost estimate for utilizing the existing treatment building
- Cost estimate for providing a new treatment building

Phase 8 – Regulatory and Permitting

Task 1. La Puente Building and Safety Plan Check Requirements

Civiltec will obtain the City of La Puente Building and Safety Plan Check applications and review ordinances that may impact the design (such as building height limits, set-back requirements, construction work hours etc.) and estimate fees.

Task 2. Division of Drinking Water (DDW) Permitting Requirements

Civiltec will review LPVCWD's operating permit to confirm the proposed UV treatment system would be in compliance treatment goals. We will coordinate with LPVCWD and DDW to confirm treatment system configuration requirements such as startup and testing protocols, testing durations, treatment system capacity and configuration requirements.

Phase 8 Deliverables

- City of La Puente Building and Safety draft Plan check application
- Documentation of correspondence with DDW and LPVCWD's operating permit

Phase 9 – Feasibility Study Development

Task 1. Draft UV Treatment System Feasibility Study

As stated in Phase 2 of this scope of services, *Civiltec* will develop the Feasibility Study and hold a teleconference workshop review of the draft with LPVCWD. Comments from this workshop will be addressed/incorporated into the draft Feasibility Study submittal for review by LPVCWD and project stakeholders. Review comments on the draft Feasibility Study will be addressed/incorporated into the final document.

The UV Feasibility Study is anticipated to include following sections:

- 1. Introduction
- 2. Existing Site and Process Configuration
- 3. Project Design Criteria
- 4. Feasibility of UV Treatment System Locations
 - a. Existing Treatment Building
 - i. Conceptual layout
 - *ii.* Construction challenges
 - *iii. Operational challenges*
 - iv. Providing electrical power
 - v. Construction cost
 - vi. Interim DDW testing period configuration
 - vii. Post installation demolition of existing LPUV facilities

Roy Frausto | La Puente Valley County Water District UVAOP Replacement Feasibility Study June 5, 2025 Page 6

- b. New UV Treatment Building
 - i. Conceptual layout
 - *ii.* Construction challenges
 - iii. Operational challenges
 - iv. Site constraint challenges
 - v. Providing electrical power
 - vi. Construction cost
 - vii. Interim DDW testing period configuration
 - viii. Post installation demolition of existing LPUV facilities
- c. Recommended Siting of New UV Treatment System
- 5. Permitting
 - a. DDW Requirements
 - b. City La Puente Building and Safety Plan Check Requirements
- 6. Summary and Recommended Siting Option

Appendices

Task 2. Final UV Treatment System Feasibility Study

Civiltec will address/incorporate LPVCWD and project stakeholders comments on the draft report into the final Feasibility Study.

Phase 9 Deliverables:

- Draft Feasibility Study
- Reponses to draft study comments
- Final Feasibility Study

SCHEDULE

Civiltec is available to commence this project immediately. Based on the scope of work described previously, we can complete this project by September 2, 2025. A proposed project schedule is included as Appendix B.

FEE DISTRIBUTION SCHEDULE

Professional fees for the above-described services will be billed on a fixed fee basis as summarized in the following table. A breakdown of our hours and fees is included as Attachment A.

| Phase 1. Project Management, Meetings, and Site Visits | \$7,650.00 |
|---|-------------|
| Phase 2. Existing Conditions Research and Basemap Development | \$8,110.00 |
| Phase 3. Coordination With Equipment Vendor | \$3,220.00 |
| Phase 4. Design Criteria Technical Memorandum | \$2,220.00 |
| Phase 5. Hydraulic Analysis | \$2,980.00 |
| Phase 6. Concept Layouts | \$19,370.00 |
| Phase 7. Construction Cost Estimates of UV Equipment Siting Options | \$17,860.00 |
| Phase 8. Regulatory and Permitting | \$2,850.00 |
| Phase 9. Feasibility Study Development | \$33,995.00 |
| | |

Total<u>\$98,255.00</u>

Any work not authorized within 3 months of the date of this proposal will be subject to renegotiations based on current rates. Capacity and impact fees associated with application filings shall be the responsibility of the LPVCWD. Additional services may be authorized by LPVCWD based on *Civiltec's* Hourly Rate Schedule. *Civiltec* will bill monthly for all work performed and expenses incurred on the project's behalf.

If this proposal is acceptable, please return a signed copy to our office. Again, thank you for the opportunity to submit this proposal. We look forward to working with you on this project. Please contact the undersigned directly with any comments or questions.

| Date: | July 14, 2025 |
|-----------------|---|
| То: | July 14, 2025 Honorable Board of Directors |
| Subject: | Ratification of Purchase of a New 2025 Chevrolet Silverado 1500 Extended Cab |
| Purpose: | Purchase a new pickup truck to support water system operations. |
| Recommendation: | Ratify the General Manager's purchase of a 2025 Chevrolet Silverado 1500 Extended Cab. |
| Fiscal Impact: | The District's 2025 Capital Budget appropriates \$90,000 for Fleet Trucks. The 2025 current year-to-date total for this expense category is \$0.00. The cost of \$37,053.78 for the purchase of this truck is within the budget appropriation. |

BACKGROUND

The District currently has 10 vehicles that are utilized by Field Staff, Supervisors, and Superintendents to reliably operate the treatment facilities and distribution systems. Recently, trucks 14 (2000 Ford 450) and 17 (2004 Ford F 350) were recently sold off at the auction (due to age and mechanical issues) house bringing our total available trucks to use from 12 to 10. The plan is to have 12 vehicles available with the purchase of this vehicle along with another in the near future.

SUMMARY

For the purchase of the new vehicle, staff requested quotes from different dealerships. A summary of the price is provided below for each vehicle:

| Make | Year | Model | Amount | Dealership |
|-----------|------|-----------------------------|-------------|---------------------------|
| Chevrolet | 2025 | Silverado 1500 Extended Cab | \$37,053.78 | Puente Hills Chevrolet |
| Chevrolet | 2025 | Silverado 1500 Extended Cab | \$41,720 | Covina Hills Chevrolet |
| Chevrolet | 2025 | Silverado 1500 Extended Cab | \$43,995 | Sierra Auto Chevrolet |

The lowest quote received was from Puente Hills Chevrolet.

(626) 330-2126 lapuentewater.com

FISCAL IMPACT

The District's 2025 Capital Budget appropriates \$90,000 for Fleet Trucks. The 2025 current year-to-date total for this expense category is \$0.00. The cost of \$37,053.78 for the purchase of this truck is within the budget appropriation.

RECOMMENDATION

Ratify the General Manager's purchase of a 2025 Chevrolet Silverado 1500 Extended Cab.

Respectfully Submitted,

tu

Roy Frausto General Manager

To:Honorable Board of DirectorsDate:July 14, 2025From:Cesar A. Ortiz, Operations & Treatment SuperintendentSubject:Monthly Operations & Treatment Superintendent Report

The following report summarizes LPVCWD, IPU Waterworks System, BPOU and PVOU-IZ & SZ treatment operations, water quality, compliance, production, and consumption, and includes the status of various projects for each system.

WATER QUALITY / COMPLIANCE

- **Distribution System Monitoring** District Staff collected all required water quality samples for the month from both distribution systems, 24 samples from LPVCWD & 27 samples from CIWS. All results met State and Federal drinking water quality regulations.
- Treatment Monitoring & Compliance All water quality compliance samples were collected from all the treatment processes and plant effluent, as required. Approximately 183 samples were collected for BPOU, 87 samples for PVOU-IZ, and 0 samples for PVOU-SZ.
- Source Monitoring All water quality samples were collected from all the Wells, as required. Approximately 61 samples were collected.

| | СТС | РСЕ | TCE | Perchlorate | 1,4-Dioxane | NDMA | Nitrate |
|--------------|------------|-----------|-------------|-------------|-------------|-----------|------------|
| Well Sampled | MC L=6 ppb | MCL=5 ppb | MCL = 5 ppb | MCL=6 ppb | NL = 1 ppb | NL=10 ppt | MCL=10 ppm |

WELL PRODUCTION AND LEVELS

Production by Wells and total acre feet for LPVCWD and CIWS are as shown in the table below. •

| LPVCWD - BPOU Wells | Well 2 | Well 3 | Well 5 | Total Acre Feet Produced |
|---------------------|-----------|---------|----------|---------------------------------|
| Acre Feet Produced | 148.39 AF | 0.75 AF | 52.19 AF | 201.33 AF |

| CIWS Wells | CIWS Well 5 to SGVWC | SGVWC to CIWS at Lomitas |
|--------------------|----------------------|--------------------------|
| Acre Feet Produced | 140.44 AF | 108.46 AF |

| Suburban Water System | 64.91 AF | Total Acre Feet Delivered to |
|-----------------------|----------|------------------------------|
|-----------------------|----------|------------------------------|

OPERATIONAL UPDATES / PROJECTS & MAINTENANCE ACTIVITIES

1) **BPOU Treatment Plant**

Plant Operations –

- On June 6th, 2025, Air Stripper No. 1 Blower and motor had a major failure occur, the unit has been out of service since that day. A new unit has been ordered and has a lead time of 6 to 8 weeks. As soon as the new unit is delivered it will be installed by a contractor and placed back into service.
- The treatment plant is in reduced flow operation at 1500 gpm with only Well No. 2 online the majority of the time and Wells No. 5 and No. 3 being run only for sampling purposes.

Project / Maintenance Items -

- On June 26th, 2025, staff (Alyssa) performed the Annual Inspections of both the Air Stripper No. 1 and Air Stripper No. 2 Towers, for any performance reducing issues or internally visible maintenance or repair requirements, as well as the state of the internal media inside of the towers.
- o Staff have performed various weekly chemical calibrations, monthly analyzer cleanings and calibrations, SPIX pre-filter change-outs, daily treatment plant rounds and monthly reporting.

2) PVOU-IZ Treatment Plant

- **Plant Operations**
 - Staff initiated the restart of the IZ plant to normal intern operation, while awaiting SWRCB-DDW permit approval. Operating at a flow of approximately 600 gpm and rotating equipment during operations.

Page 2 of 4

- With the IZ plant back to normal operation, the IZ plant will run for 20 days at a time, and it is then shut down for 24 hours and then restarted, per the NPDES requirements, until approval is received from SWRCB-DDW.
- Maintenance Items
 - The Northrup Grumman (NG) approved, electrical conduit rework on both IZ & SZ Wigen RO systems have been completed.

3) PVOU-SZ Treatment Plant

• Plant Operations –

- Staff completed the NG approved sampling protocol/plan (at 85gpm) for processes confirmation/ monitoring purposes, in regard to TPH. We are awaiting direction from NG on their path forward in addressing the TPH issue.
- Under the direction of Northrup Grumman staff has continued to keep the SZ plant operating at 85 gpm with discharge to LACSD as wastewater tank levels permit, the tank is used in conjunction with the IZ plant as well, operations vary daily depending on tank levels.

• Maintenance Items –

• Staff conduct plant and sampling ports prep, general plant maintenance, preventative maintenance, corrective maintenance, order chemicals, and housekeeping.

4) **CIWS Distribution Sites**

- The Lomitas generator replacement project is close to completion, with the new generator already installed under oversight by City of Industry's engineering firm – CNC. Staff has acquired a current City of Industry contractor for maintenance and service of the new unit to begin this month.
- The VFD for Lomitas Booster 3 failed and was replaced on June 12, 2025, and has been functioning well thus far.

- **To:** Honorable Board of Directors
- From: Roy Frausto, General Manager
- **RE:** General Manager's Report

GENERAL MANAGER REPORT TOPICS

- PVOU Permit Amendment DDW requested that LPVCWD develop a sampling plan to sample the IZ plant throughout all treatment components to verify efficacy of COC removal and analysis of TPH throughout the sources and system. Still pending final approval to then initiate sampling plan.
- PVOU Public Hearing Staff drafted a final notice of a public hearing to advise and educate the community on the new PVOU-IZ source.
- PVOU TPH Ongoing investigation of TPH detections at the PVOU-IZ and SZ systems
- District Office Staff is working with CNC engineering and City staff to develop a description of the proposed property.
- BPOU Agreement Preliminary meetings of the BPOU Agreement have begun.
- UV System Replacement Staff received a proposal from Civiltec to conduct a feasibility study of the UV Flex system and is planning to complete the study be Q4 of this year.
- Salt Lake Project Participated in the City's pre-bid walk at the site. Project has been formally awarded and work is expected to begin late August.
- 3M PFAS Settlement The District's PFAS settlement with 3M is now available and cleared to receive its first disbursement.
- Bamboo St. & Dalesford Dr. CIP Staff is beginning the planning and design phase of the Bamboo St. & Dalesford Dr. project that consist of installing a pressure sustaining/regulating valve on Bamboo Street.
